C

Supplementary Fig. S3. Patient 009 exhibited elevated cytokine, C-reactive protein, and ferritin levels prior to and after CART19/20 cell infusion. (A) Serum levels of various

cytokines measured by Luminex multiplex assay. **(B)** C-reactive protein (CRP) levels for Patient 009 (left-most) and all patients (second from left). Peak and median CRP levels are shown in box-and-whisker plots. **(C)** Ferritin levels for Patient 009 (left-most) and all patients (second from left). Peak and median ferritin levels are shown in box-and-whisker plots.
