

## Supplementary Figure S6

**A**

**B**

**Supplementary Fig. S6. T cell populations become CD8-dominant post CART19/20 cell infusion.** % CD8<sup>+</sup> among (A) CAR-expressing T cells and (B) all CD3<sup>+</sup> T cells was quantified by flow cytometry. Data are shown for CAR-T cells only up to day 90 post infusion as values post day 90 become unreliable due to low CAR<sup>+</sup> cell count detected by flow. FP: final product (i.e., cryopreserved CART19/20 cells).
