

Supplementary Figure S1

(A) Serial sampling of *Atg5^{L/+}* and *Atg5^{L/L}* mouse pancreata showing disrupted beta-islet in *Atg5^{L/L}* mice starting from 12 weeks of age. Scale bar: 100 μ m. (B) IHC for insulin demonstrates loss of insulin producing cells in the *Atg5^{L/L}* islets. *Atg5^{L/+}* pancreata are shown as controls.
