

Supplementary Table 3. Clinical Information of 8 pairs of Pancreatic Cancer Samples Used for Microarray Analysis

Patient	Gender	Age	Classification	Diagnosis/Description
P1	Male	64	Normal	Pancreatic tissue adjacent to pancreatic adenocarcinoma
			Tumor	Moderately differentiated pancreatic adenocarcinoma with metastasis to lymph nodes
P2	Female	38	Normal	Pancreatic tissue adjacent to pancreatic adenocarcinoma
			Tumor	Undifferentiated small cell carcinoma of the pancreas with metastasis to lymph nodes
P3	Male	69	Normal	Pancreatic tissue adjacent to pancreatic adenocarcinoma
			Tumor	Well differentiated pancreatic adenocarcinoma with metastasis to lymph nodes
P4	Female	69	Normal	Pancreatic tissue adjacent to pancreatic adenocarcinoma
			Tumor	Poorly differentiated pancreatic adenocarcinoma; no metastasis
P5	Female	65	Normal	Pancreatic tissue adjacent to pancreatic adenocarcinoma
			Tumor	Well differentiated pancreatic adenocarcinoma; no metastasis
P6	Female	73	Normal	Pancreatic tissue adjacent to pancreatic adenocarcinoma
			Tumor	Pancreatic mucinous cystadenocarcinoma with perineural invasion
P7	Male	59	Normal	Pancreatic tissue adjacent to pancreatic adenocarcinoma
			Tumor	Pancreatic adenocarcinoma
P8	Female	52	Normal	Pancreatic tissue adjacent to pancreatic adenocarcinoma
			Tumor	Pancreatic adenocarcinoma with advanced metastasis
