

Supplemental Figure 5. Representative HMVP2 tumors from untreated mice. A, H&E stain of a section of a tumor derived from sc injection of spheroids into FVB/N mice after 28 days. B-D, Higher magnification of the outlined tumor section. E-F, Immunofluorescence staining of a tumor derived from HMVP2 cells (E, blue: DAPI, green: E-cadherin, red: CD49), (F, blue: DAPI, red: Sca-1).
