

Supplemental Fig. S2

| | Significance |
|-----------------------------|--------------|
| $Asc^{+/+}$ vs. $Asc^{+/-}$ | $p < 0.20$ |
| $Asc^{+/+}$ vs. $Asc^{-/-}$ | $p < 0.05$ |

Supplemental Figure S2. *Top*, Scatter plot showing difference in MM incidence between asbestos-exposed wild-type (WT, $Asc^{+/+}$), $Asc^{+/-}$, and $Asc^{-/-}$ mice. *Bottom*, summary showing statistically significant difference in MM incidence between WT mice and $Asc^{-/-}$ mice ($p < 0.05$), but not between WT and $Asc^{+/-}$ mice.
