

## SUPPLEMENTARY DATA

*Figure S1. Expression of selected targets after ectopic p73 $\alpha$ , p73 $\alpha$ 292, and p73 $\beta$  expression.* Relative expression of selected targets IEX-1, c-IPA1, Apaf1, Bax, Bak and Noxa described in Figure 3A-B were quantified using ImageQuant software. Data are expressed relative to maximum signal and are means of duplicate +/- S.D. in one of three independent experiments.
