

Fig. 1S. The JNK inhibitor SP600125 does not inhibit c-FLIP downregulation induced by celecoxib. H157 cells were pretreated with the indicated concentrations of SP600125 for 30 min and then co-treated with 50 mM celecoxib (CCB) for 7 h. Whole-cell protein lysates were then prepared for detection of the given proteins using Western blot analysis with actin serving as the loading control.
