

Supplementary Fig. 4

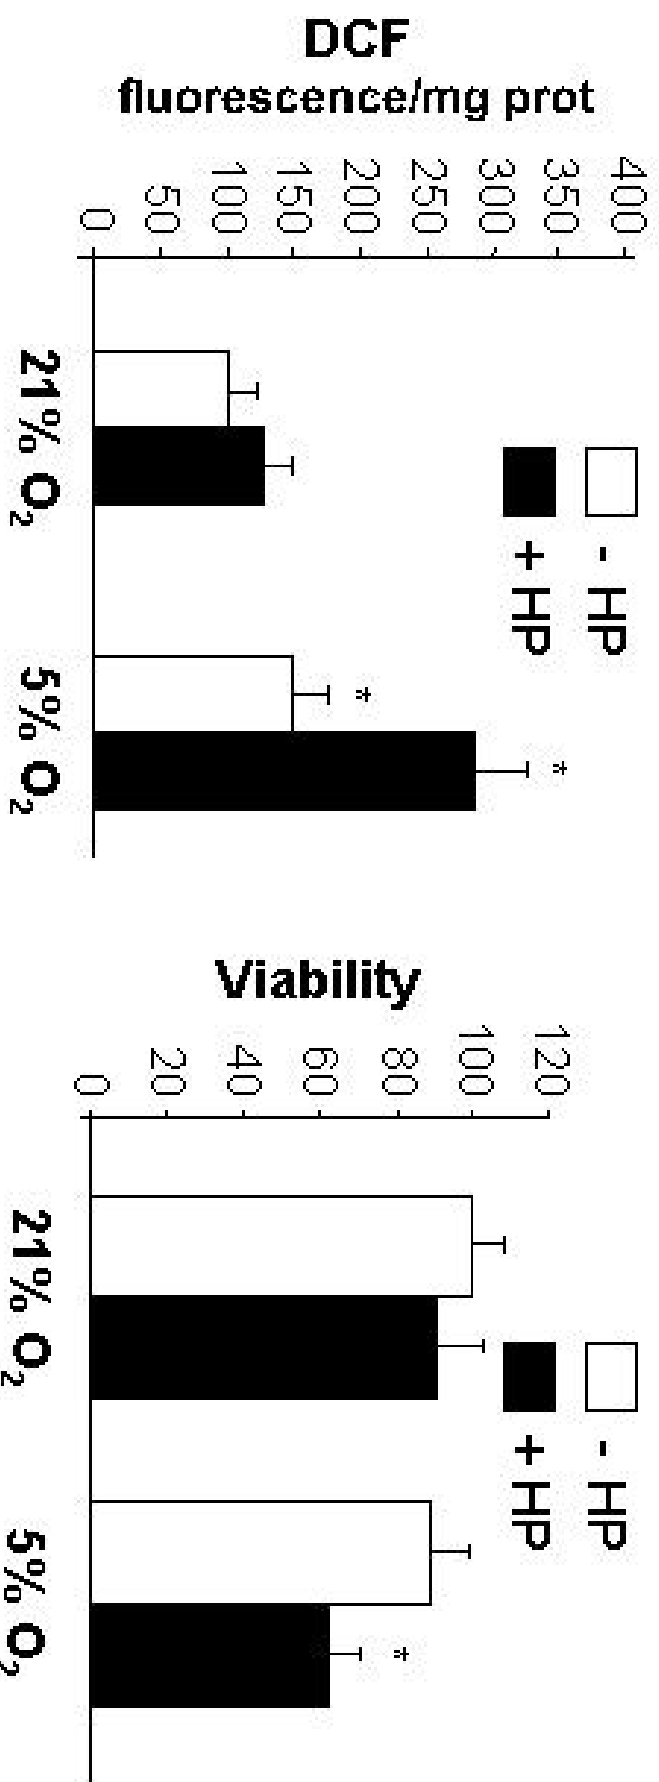

Figure 4. **Role of HP in the survival of SH-SY5Y cells during 5% O₂ incubation.** SH-SY5Y cells were preincubated with HP to deplete mGSH, as shown in Figure 4A, and then subjected to 5% O₂ for 72 hours determining the DCF fluorescence and the survival. The data is the mean \pm SD of 3-4 separate experiments. *p<0.05 vs. cells without HP.
