

**Supplementary Figure 1. Expression levels of angiogenic factors, including CXC chemokines and VEGF in MIApaca-2 cell lines showing low and high NDRG1/Cap43 expression. QRT-PCR analysis of NCAM1, Groa/CXCL1, ENA-78/CXCL5, IL8/CXCL8 and VEGF-A mRNA levels in NDRG1/Cap43 transfectants and mock transfectants of MIApaca-2 cells. The housekeeping gene glyceraldehyde-3-phosphate dehydrogenase (GAPDH) was used for normalization. The relative expression for each sample was determined as described in Materials and Methods. Results are the mean values  $\pm$  SD of three independent experiments. \*,  $P < 0.05$ ; \*\*,  $P < 0.01$  versus Mock#2 cells.**
