

## Supplemental Figure 6

**Supplemental Figure 6 Serine-rich region of DNAJB8 has role for induction of SP cells.**  
**A** Schematic representation of  $\Delta$ SSF-SST mutant construct. C-Domain, C-terminal domain. **B** SP analysis of DNAJB8 and  $\Delta$ SSF-SST mutant-transduced ACHN cells. DNAJB8 or  $\Delta$ SSF-SST mutant transduced ACHN cells were analyzed for SP cells. Mock-transduced cells were used as negative controls. The percentages indicate the ratios of SP cells.
