IT AAV9.trastuzumab	9	40	0.862
No treatment	12	37	-

C

Supplemental Figure 6. IT AAV9.trastuzumab tumor prophylaxis in NOD *scid* gamma mice. (A) Kaplan-Meier survival curves for mice that received IT AAV9.trastuzumab tumor treatment or no treatment at least 21 days before tumor challenge. (B) Tabulated survival and statistical data for Supplemental Fig. 6A. (C) IgG quantified in brain tissue from experiment in Fig. 6A measured by protein A ELISA of brain homogenate and graphed as a percent of total protein in brain homogenate.
