

Supplementary Figure 3

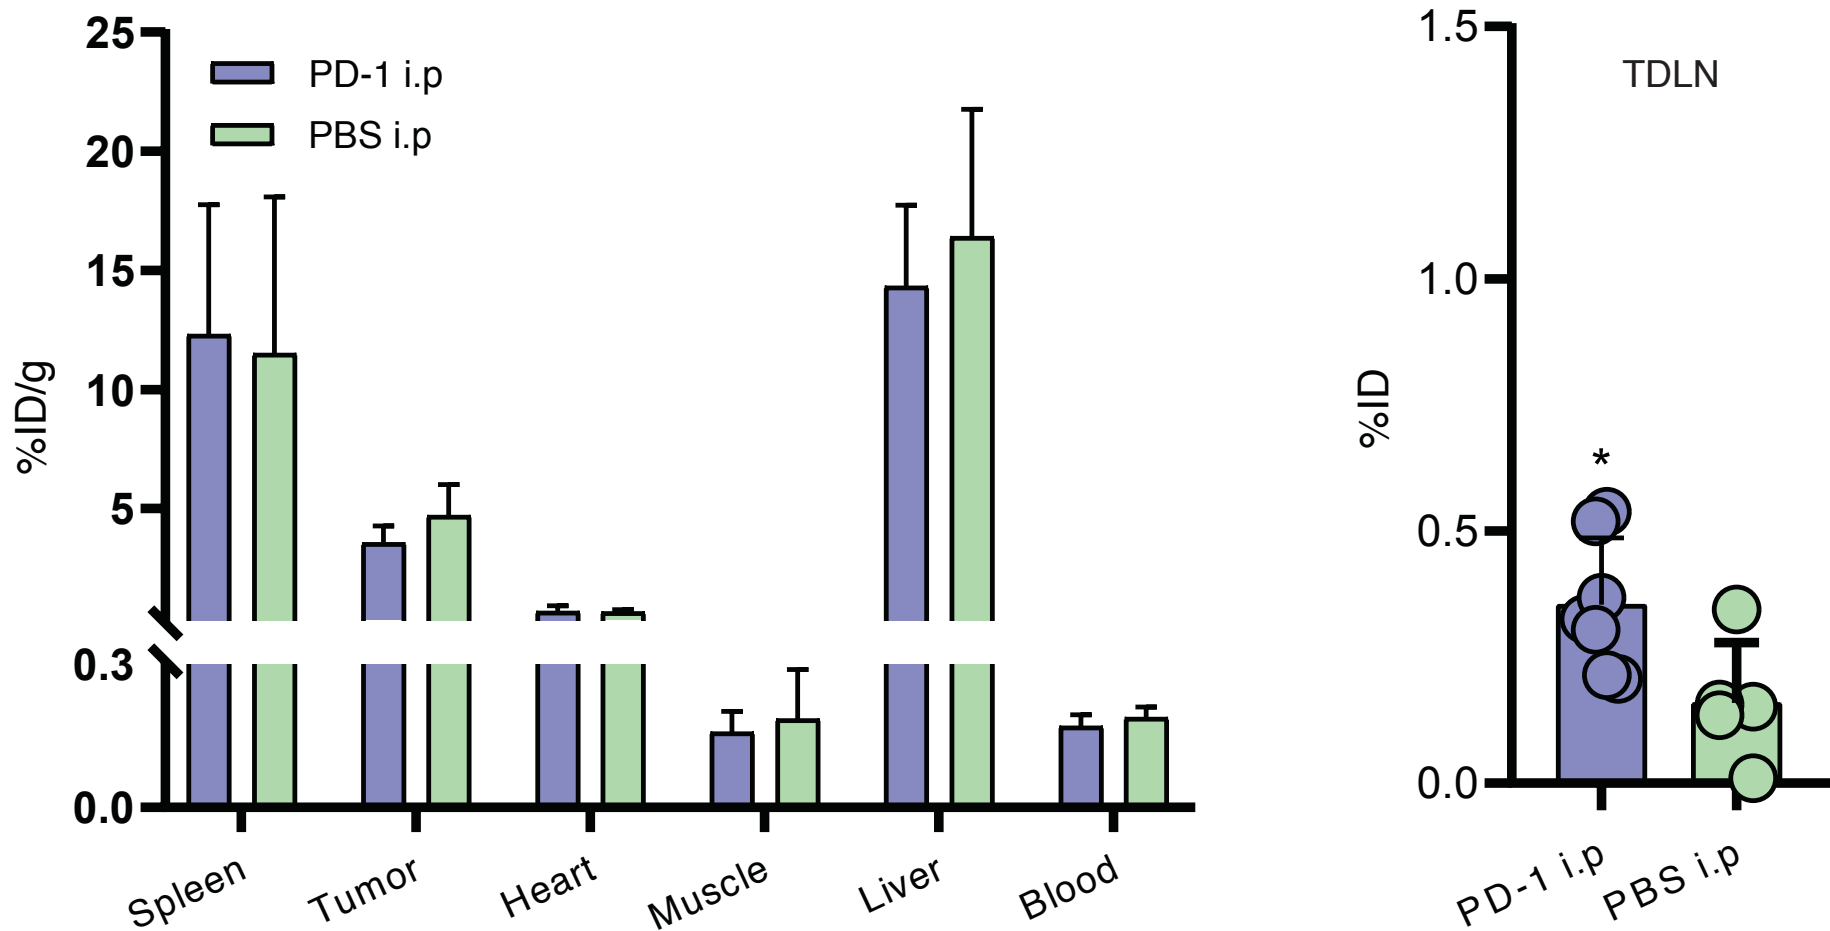

Figure S3: Ex-vivo biodistribution study of PD-1 i.p and PBS i.p groups (n≥5) on Day 8 post anti PD-1 treatment: the quantification of TDLN was expressed as %ID, other organs were expressed as %ID/g. All values represent the mean ± SD unless otherwise specified. Unpaired 2-tailed student's t-test were used for analysis. (*: P<0.05, the data was presented as mean ± SD)
