

**Yang FF, et al. Figure S1**

**Figure S1. Gating strategy for macrophages in the liver and SP as well as monocytes/macrophages in the transplantation experiments at the steady state.**

Gating strategy for macrophages in liver (A) and SP (B). (C) Gating strategy for sorting Ly6C<sup>+</sup> and Ly6C<sup>-</sup> monocytes from CD45.2<sup>+</sup> donor. The purity of sorted cells is shown. (D) Gating strategy for CD45.1<sup>-</sup> macrophages in the SP after transplantation of CD45.2<sup>+</sup> Ly6C<sup>+</sup> or Ly6C<sup>-</sup> monocytes. (E) Gating strategy for CD45.2<sup>+</sup> monocytes in PB after transplantation of CD45.2<sup>+</sup> Ly6C<sup>+</sup> monocytes.
