

INFORMATION FOR AUTHORS

Manuscripts for *Cancer Research* must represent new and original contributions, not previously published, and, if accepted, not to be published elsewhere. They should be typed, double-spaced, with ample margins, on bond paper. The original and one carbon copy should be submitted. Manuscript pages should be numbered consecutively.

Critical reviews on subjects dealing with cancer and allied fields will be considered for publication in *Cancer Research*. Such reviews should attempt to correlate the various approaches to a problem in a manner that will indicate the trends and emphasize the aspects that require further clarification. Critical analyses of the pertinent issues and expressions of opinions are encouraged. Preferably, the reviews should not exceed 7 pages (6,000 words) in length, including references.

Comments: A limited space will be available for the publication of comments on published data in the cancer field; they should not exceed 500 words. Comments written for the presentation of new data will not be published.

The title of the paper should be as short as is compatible with a clear indication of the subject matter. Chemical formulas should not be included in the title. The title of the paper, the name of the author (or authors), his degrees, location, and any acknowledgments should appear on a separate page.

Footnotes should be numbered consecutively and should appear on a separate sheet.

Tables should be typed on separate sheets and should be numbered. Each must have a brief descriptive title. Tables should be arranged for vertical position on the page, either in single or double column. Every column must be supplied with an appropriate heading.

Illustrations in moderate numbers will be accepted if they are of good technical quality and essential for the clarity of the presentation. Plates in color and excessive numbers of illustrations, if accepted, will be charged to the au-

thor. The careful preparation of illustrations, charts, and graphs is particularly important. For half-tones, clear glossy photographs should be submitted. If possible, photographs should be trimmed to fit either the one- or two-column width of the page. When several photographs are grouped, the total area should not exceed the size of the printed page ($6 \times 8\frac{1}{2}$ inches). This will eliminate any reduction of magnification by the printer. Line drawings, charts, or graphs may be of any size but should be so prepared that no letter or figure is less than 2 mm. high after reduction to the size in which it will appear. Drawings should be made with India ink. Mailing is facilitated if the size of the mounts does not exceed $8\frac{1}{2} \times 11$ inches. Legends for each illustration should be typed separately, in consecutive order, on standard-sized paper.

References should include, in order: author, title, journal abbreviation (*Quarterly Cumulative Index Medicus* form), volume number in arabic numerals, inclusive pages, and year. Book references should give: author, title, pages, edition number, city, publisher, and year. All references should be checked with the original publications and should be *arranged in alphabetical order*. Each number in the references is to refer to only one paper. References to unpublished work or personal communications should appear in footnotes. The following examples illustrate the desired style:

WOGLOM, W. H. Please! An Editorial. *Cancer Research*, 2:846-50, 1942.

GREENSTEIN, J. P. *Biochemistry of Cancer*. Pp. 5-20. 1st ed. New York: Academic Press, Inc., 1947.

Reprints may be ordered before publication, at cost, according to a schedule of prices accompanying the galley proof of the article.

Manuscripts, reviews, and correspondence related to contributions should be addressed to: DR. HAROLD P. RUSCH, Editor, *CANCER RESEARCH*, McArdle Memorial Laboratory, University of Wisconsin, Madison 6, Wisconsin.

INFORMATION FOR SUBSCRIBERS

All subscriptions and business inquiries should be addressed to the publishers, THE

UNIVERSITY OF CHICAGO PRESS, 5750 Ellis Avenue, Chicago 37, Illinois.

**A NEW TECHNICON
microslide cabinet for**

flat-filing

As slides are freshly completed they are put at once into these compartmented flat-filing trays. The slides are then handled, filed, and dried in the same tray: they need never be removed except for microscopic examination. Slides do not contact each other, drying is speedier, cover glasses stay put.

Complete visibility. Each specimen, with its identification data, stands out boldly against the neutral gray background of the tray floor . . . a great convenience in the storage, distribution, and return-checking of reference collections in classroom work.

Large capacity. Fifty drawers in each cabinet, with sixteen or thirty-two slides to the drawer. All-steel construction throughout, like all other Technicon "LAB-AID" microslide files.

Fresh slides go directly from laboratory-to-microscopist-to-file, always in the same light-weight metal tray. Cabinet units are small enough to fit easily on desk, and can be stacked with existing "LAB-AID" vertical slide-files.
