

Anti hLH   Anti hCG   Anti hAFP   Anti hTSH

# Monoclonal Antibodies...

## We're Here!

Monoclonal Antibodies, Inc., announces our expanded selection of monoclonal antibodies to antigens of clinical relevance. These are suitable for immunoassays such as RIA, EIA, and immunohistochemistry, and for immune purification. Now available in two grades for research purposes: **Immunoassay Grade** and **Immunochemical Grade**.

New  
Clones

- **Anti Human Chorionic Gonadotropin.** Multiple clones specific for the beta subunit (cross reactivity with LH less than 1% in some clones).

New  
Clones

- **Anti Human Thyroid Stimulating Hormone.** Multiple clones specific for the beta subunit (no detectable cross reactivity with LH or hCG in some clones).

- **Anti Human Luteinizing Hormone.** Multiple clones.

- **Anti Human Alpha-Fetoprotein.**

Enter the world of **monoclonal engineering** today with these precisely defined reagents offering the homogeneity, consistency, and affinity you've wanted. Ask about our special evaluation sets. Look for additional products soon.

### And we haven't forgotten:

Companion reagents especially prepared for use with monoclonals of mouse origin.

- Anti Mouse IgG
- Peroxidase Conjugated Anti Mouse IgG
- Alkaline Phosphatase Conjugated Anti Mouse IgG
- Fluorescein Conjugated Anti Mouse IgG
