There are now three solutions for your detection problems, VECTASTAIN® ABC (peroxidase), VECTASTAIN® ABC-AP (alkaline phosphatase) or VECTASTAIN® ABC-GO (glucose oxidase). Although the enzyme used for detection differs, all three VECTASTAIN® ABC systems utilize our Avidin-Biotinylated enzyme Complex to achieve maximum sensitivity and low backgrounds. Each VECTASTAIN® ABC system has particular advantages in specific applications. We welcome your inquiries for full details or information on current applications.
