

# CELL GROWTH & DIFFERENTIATION

The Molecular Biology Journal of the  
American Association for Cancer Research

A NEW monthly journal devoted to  
the rapid publication of trend-setting research  
in the dynamic field of molecular biology

## SCOPE

Original *in vitro* and *in vivo* studies of mechanisms underlying normal and abnormal cell behavior and cell growth control

- Characterization of genes, their products, properties, and functional role in cell proliferation and differentiation
- Gene expression and activation
- Transcriptional regulation
- Cell responses from mitogenic stimulation through mitotic phosphorylation and cell division

Research Capsules: updates of changing concepts in the field

Viewpoints section: write-in dialogue concerning published articles
