

**INTERNATIONAL AGENCY FOR RESEARCH ON CANCER
WORLD HEALTH ORGANIZATION
LYON - FRANCE**

**FELLOWSHIPS FOR RESEARCH TRAINING IN CANCER
1991-1992**

Applications for training fellowships in 1991-1992 are invited from junior scientists wishing to be trained in those aspects of cancer research related to the Agency's own programmes: epidemiology, biostatistics, environmental and viral carcinogenesis and mechanisms of carcinogenesis.

Applicants should be engaged in research in medical or allied sciences and intend to pursue a career in cancer research.

Fellowships are awarded for one year and are tenable at the Agency or in another suitable institution abroad. Fellows will, in general, be selected from applicants with some postdoctoral research experience related to cancer in medicine or the natural sciences. Applicants requiring basic training in cancer epidemiology will also be considered. They must have an adequate knowledge, both written and spoken, of the language of the country in which their fellowship is tenable.

Applications cannot be accepted from people already holding fellowships enabling them to study abroad.

Stipends will vary according to the cost of living in the country of study. The cost of travel for the applicant, and in certain circumstances, that of one dependent, will be met.

Fellowship application forms and more detailed information are available from:

Chairman of the Fellowships Selection Committee

INTERNATIONAL AGENCY FOR RESEARCH ON CANCER

150 cours Albert-Thomas, 69372 Lyon Cedex 08 France

Applications must reach the Agency no later than 31 December 1990.

POSITION AVAILABLE

Faculty position, assistant professor level, in Experimental Radiation Oncology, School of Medicine, University of California, Los Angeles. Applicant should have a Ph.D. in biomedical sciences, at least 3-4 years postdoc research experience as a molecular oncologist, and a background in radiobiology and/or tumor immunology. Evidence of teaching ability would be an asset. Salary \$51,900-\$58,500/yr.

Address inquiries with C.V. to: Robert Parker, M.D., Dept. of Radiation Oncology, UCLA, 10833 LeConte Ave., Los Angeles, CA 90024-1714.

An Affirmative Action/Equal Opportunity Employer.

Plenum Books

ADVANCES IN CANCER RESEARCH

Forthcoming . . .

**MOLECULAR AND CELLULAR
BIOLOGY OF MULTIDRUG RESISTANCE
IN TUMOR CELLS**

edited by **Igor B. Roninson**

Contributors summarize the results of molecular, biological, pharmacological, biochemical, cytogenic, immunological, and pathological studies on multidrug resistance. Topics covered include: structure and function of P-glycoproteins, pharmacokinetics, biochemical and genetic changes in multidrug-resistant cells, methods of molecular diagnostics of multidrug resistance in clinical cancer, and chemical and immunotherapeutic approaches to circumvention of clinical drug resistance.

0-306-43547-0/approx. 400 pp./ill./1991

THE PATHOBIOLOGY OF NEOPLASIA

edited by **Alphonse E. Sirica**

This volume presents comprehensive coverage of current research in the etiology, pathology, biochemistry, molecular biology, and genetics of neoplastic disease in both animals and plants. Important aspects of tumor pathology are integrated with recent research findings related to carcinogenesis, cancer cell genetics and biochemistry, oncogenes, growth factors, oncodevelopmental expression, neoplastic cell differentiation, preneoplasia, tumor progression and invasion, and metastasis.

0-306-42950-0/606 pp./ill./1989/\$85.00

text adoption price on orders of six or more copies: \$47.50

CANCER AND NUTRITION

edited by **Roslyn B. Alfin-Slater** and
David Kritchevsky

This volume presents a detailed, balanced account of the relationship between nutrition and the epidemiology, treatment, and prevention of cancer. Chapters review the relationships between cancer and carbohydrates, dietary protein, fat, serum cholesterol, and dietary fiber. Volume 7 in the series Human Nutrition: A Comprehensive Treatise.

0-306-43425-3/485 pp. + index/ill./1990/\$95.00

Basic Life Sciences

Volume 52

**ANTIMUTAGENESIS AND
ANTICARCINOGENESIS MECHANISMS II**

edited by **Yukiaki Kuroda**, **Delbert M. Shankel**,
and **Michael D. Waters**

Antimutagenesis, anticarcinogenesis, and the intricate relationships between them are of clear significance in cancer, hereditary illnesses, and perhaps even in aging. In this volume, basic, clinical, and applied scientists review the latest advances and research in this field.

0-306-43403-2/proceedings/498 pp./ill./1990/\$95.00

Volume 50

**CLINICAL ASPECTS OF NEUTRON
CAPTURE THERAPY**

edited by **Ralph G. Fairchild**, **Victor P. Bond**, and
Avril D. Woodhead

Topics covered include: neutron capture therapy (NCT) in support of other radiation treatments, NCT for melanoma, drug delivery to brain tumors, and boron NCT in glioblastoma multiforms.

0-306-43114-9/proceedings/384 pp./ill./1989/\$69.50

Book prices are 20% higher outside US & Canada.

Information and Application Forms

American Association for Cancer Research
Public Ledger Building, Suite 816
Sixth and Chestnut Streets
Philadelphia, PA 19106
215-440-9300 215-440-9313 (FAX)

Application Deadline:
December 3, 1990

Late applications will be accepted on a space-available basis.

POSTDOCTORAL RESEARCH FELLOWSHIP IN CANCER IMMUNOLOGY

Program emphasizes the generation and characterization of human tumor-specific T lymphocytes and the effects of T cell activation factors (e.g., lymphokines and antibodies) on T cell growth and function. Results influence design of ongoing clinical cancer therapy trials of lymphocytes and lymphokines, which provide additional material for laboratory studies. MD or PhD, and training in cellular immunology required. Send CV to: Alexander Fefer, MD, Division of Oncology RM-17, Department of Medicine, School of Medicine, University of Washington, Seattle WA 98195; phone (206) 543-8556; FAX (206) 685-3128.

AN EQUAL OPPORTUNITY / AFFIRMATIVE ACTION EMPLOYER.

NEW ADVANCES IN CANCER RESEARCH

RB GENE PRODUCT ANTIBODY

MONOCLONAL ANTIBODY TO THE RETINOBLASTOMA GENE PRODUCT

The retinoblastoma (RB) susceptibility gene functions by suppressing the cell's ability to proliferate. With loss or mutation of this "tumor suppressor gene," the cell is able to proliferate uncontrollably, a characteristic of cancer.

To further understand the role of the RB Gene in the pathogenesis of cancer, the antibody demonstrates specific reactivity in immunoprecipitation and Western blot procedures.

What will you tell her about screening mammography?

Many of your patients will hear about screening mammography through a program launched by the American Cancer Society and the American College of Radiology, and they may come to you with questions. What will you tell them?

We hope you'll encourage them to have a screening mammogram, because that, along with your regular breast examinations and their monthly self examinations, offers the best chance of early detection of breast cancer, a disease which will strike one woman in 10.

If you have questions about breast cancer detection for asymptomatic women, please contact us.

Searching for an academic position? Here's an easy way.

Find positions fast and easy.

Academic Physician lists only academic positions.

A comprehensive resource.

Medical schools and teaching hospitals throughout the U.S. will list their positions in *Academic Physician*. This bimonthly directory lists positions by subspecialty and rank.

Continuous updates.

Day-to-day updates of newly posted positions are available. Mail or FAX us your subspecialty, address and present position.

Free to all prospective candidates.

Academic Physician will be mailed free to all academic physicians, post-doctorate fellows, and senior residents. Call (916) 939-4242 to subscribe.

Equal Opportunity.

All medical schools and hospitals listing with *Academic Physician* are equal opportunity employers. This publication will be distributed to key minority medical organizations and institutions. We encourage qualified women and minority physicians to use our service.

ALZA INTRODUCES 24-HOUR, NON-STOP DELIVERY TO ANY LOCATION IN THIS AREA.

When you have to be absolutely sure the agents you're investigating are delivered where you want them, 24 hours a day, there's only one way to go: ALZET[®] osmotic pumps.

The new ALZET 2001D pump reliably and automatically delivers its contents at the rate of 8 μ l per hour—every hour—for 24 hours. Because agents are continually present, you can better assess their bioactive effects, even those with short half-lives. And ALZET pumps are implantable, so you eliminate stress to the animal and disruption of normal behavioral patterns.

Choose any route or destination. Like all

ALZET pumps, the 2001D can be implanted intraperitoneally or subcutaneously, or used with a catheter to target agents directly to remote sites.

We'll even help you get started. Over the last 12 years, thousands of researchers have used ALZET pumps. Call our Technical Information Line at 800-692-2990 and give us your fax number and area of research interest. We'll deliver a custom bibliography within 24 hours. To order ALZET pumps, call 800-227-9953. In Canada, call 800-654-2990; other countries, see listing below.

With the addition of the 2001D, ALZET osmotic pumps are now available in three sizes with durations ranging from one day to four weeks.
