

FOR GENERATIONS CANCER PLAGUED THIS FAMILY. THEN WE CAME INTO THE PICTURE.

It's a tragic coincidence that cancer has taken so many members of this family over the years.

It took Frank Domato in 1961. Patricia O'Hara Brown in 1974. And Serafino Gentile in 1982.

But the fact that the chain of tragedies has now been broken is no coincidence at all.

Over the last 40 years, research programs supported by the American Cancer Society have made increasing progress in the treatment, detection and prevention of cancer.

In 1985 alone, the Society funded over 700 projects conducted by the most distinguished scientists and research institutions in the country.

So it's no coincidence that in 1986, cancer did *not* take Debra Gentile—Frank Domato's great-granddaughter. Just as it didn't take hundreds of thousands of others who have been successfully treated for the disease.

You see, we are winning.

But we need you to help keep it that way.

 **AMERICAN CANCER SOCIETY**
Help us keep winning.

"A little goes a long way"

Quite literally.

With the lowest recommended working concentration range of any IL-2 available, you get more than specificity, more than consistency...you get economy. The ability to use less product and order less often.

You always use the same low volume of IL-2 to get the same reliable results — effective T-cell stimulation at just 10-20 U/ml. Assured through lot-by-lot calibration to the BRMP standard. And *guaranteed*.

Compare that to your current supplier.

Then call Boehringer Mannheim. For more information on our complete line of IL-2 products. And on the IL-2 preparation that's specifically suited to your needs.

Spend your time doing what really counts.

Calculate and measure soft agar assays with the fully automated Omnicon® 3600 Tumor Colony Analysis System.

Now you can get fast, accurate, reliable results while you eliminate time-consuming manual counting.

The Omnicon® 3600 Tumor Colony Analysis System is a powerful combination of the industry's most advanced image analyzer, a unique automatic stage, and software dedicated to counting soft agar assays.

This system can completely analyze a 35mm petri dish in just 2.5 minutes. With it, you can test the effectiveness of at least 15 drugs in the time it takes to manually test one. You'll see instant results that can be saved on disks, imported to another data base or printed.

Sophisticated, yet simple to operate, the Omnicon® 3600 is exceptionally easy to use, even by those with no computer experience.

When you're free from calculating, you can spend your time doing what *really* counts. For

detailed literature or to see the Omnicon® 3600 in action, call Imaging Products International, 800-551-4-IPI or (703) 803-0211.

This device is not intended for medical purposes and is not to be used in the diagnosis of disease. Omnicon® is a registered trademark of Imaging Products International, Inc.

INTERNATIONAL AGENCY FOR RESEARCH ON CANCER
WORLD HEALTH ORGANIZATION
LYON - FRANCE

**FELLOWSHIPS FOR RESEARCH TRAINING IN CANCER
1993-1994**

Applications for training fellowships in 1993-1994 are invited from junior scientists wishing to be trained in those aspects of cancer research related to the Agency's own programmes: epidemiology, biostatistics, environmental and viral carcinogenesis and mechanisms of carcinogenesis.

Applicants should be engaged in research in medical or allied sciences and intend to pursue a career in cancer research.

Fellowships are awarded for one year and are tenable at the Agency or in another suitable institution abroad. Fellows will, in general, be selected from applicants with some postdoctoral research experience related to cancer in medicine or the natural sciences. Applicants requiring basic training in cancer epidemiology will also be considered. They must have an adequate knowledge, both written and spoken, of the language of the country in which their fellowship is tenable.

Applications cannot be accepted from people already holding fellowships enabling them to study abroad.

Stipends will vary according to the cost of living in the country of study. The cost of travel for the applicant, and in certain circumstances, that of one dependent, will be met.

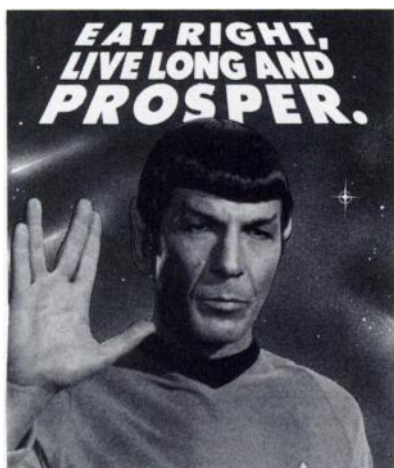

Fellowship application forms and more detailed information are available from:

UNIT OF EDUCATION AND TRAINING

INTERNATIONAL AGENCY FOR RESEARCH ON CANCER

150 cours Albert-Thomas, 69372 Lyon Cedex 08, France

Applications must reach the Agency no later than 31 December 1992.

EATING RIGHT IS HIGHLY LOGICAL.

Recommendations:

Eat high-fiber foods, such as fruits, vegetables, and whole grain products. Eat fewer high-fat foods. Maintain normal body weight. And live long and prosper.

Society for Biological Therapy Annual Meeting

October 29-November 1, 1992

*1992 Williamsburg
Conference on Biological
and Immunological
Treatments for Cancer*

*Williamsburg Lodge and
Conference Center
Williamsburg, Virginia*

TOPICS TO BE DISCUSSED:

*Recombinant Vaccines
Genetic Modulation of the Immune Response
Cytokines and Lymphokines
Anti-Idiotypic Therapy
Monoclonal Antibody-Based Therapy and Diagnostics
Differentiating Agents
Combined Therapies With Biologicals
Breaking T-Cell Tolerance
Hematopoietic and Other Growth Factors
Interferons
Gene Therapy*

*Mail a request for information to:
Biological Therapy of Cancer
11426 Rockville Pike
Suite 410
Rockville, MD 20852
Attn: Fran Oscar E

with the latest developments in

Cancer Research

**The Official Journal of the
American Association for Cancer Research**

Carlo M. Croce, M.D., Editor-in-Chief

Subscribe to Cancer Research—the leading citation source of original studies in cancer research and cancer-related biomedical science. Issued semimonthly, *Cancer Research* publishes 7,000 pages of important research each year, including the following regular features:

- **The most up-to-date articles** in basic research and clinical and epidemiological investigations by authors from the United States and more than 20 countries
- **Perspectives in Cancer Research**, in which leading investigators explore contemporary and at times controversial topics
- **Advances in Brief**, a rapid communication category for short but definitive, highly significant reports
- **Supplemental issues** developed from symposia on relevant subjects
- **Proceedings of the American Association for Cancer Research**, a special annual issue that offers stimulating new research ideas in abstract form
