

INTERNATIONAL AGENCY FOR RESEARCH ON CANCER
WORLD HEALTH ORGANIZATION
LYON - FRANCE

FELLOWSHIPS FOR RESEARCH TRAINING IN CANCER
1994-1995

Applications for training fellowships in 1994-1995 are invited from junior scientists wishing to be trained in those aspects of cancer research related to the Agency's own programmes: epidemiology, biostatistics, environmental and viral carcinogenesis and mechanisms of carcinogenesis. Applications are encouraged from epidemiologists and laboratory scientists for interdisciplinary training that will facilitate the conduct of genetic and molecular epidemiological research. Applicants requiring basic training in cancer epidemiology will also be considered.

Applicants should be engaged in research in medical or allied sciences and intend to pursue a career in cancer research.

Fellowships are awarded for one year and are tenable at the Agency or in any other suitable institution abroad. Fellows will, in general, be selected from applicants with some postdoctoral research experience related to cancer in medicine or the natural sciences. Applicants must have an adequate knowledge, both written and spoken, of the language of the country in which their fellowship is tenable.

Applications cannot be accepted from people already in receipt of funds enabling them to study abroad or who are already in their proposed host institute prior to the selection.

Stipends will vary according to the cost of living in the country of study. The cost of travel for the applicant, and in certain circumstances, that of one dependent, will be met.

Fellowship application forms and more detailed information are available from:

EDUCATION AND TRAINING PROGRAMME
INTERNATIONAL AGENCY FOR RESEARCH ON CANCER
150 cours Albert-Thomas, 69372 Lyon Cedex 08, France

Applications must reach the Agency no later than 31 December 1993.

BIOLOGICAL MECHANISMS AND
QUANTITATIVE RISK ASSESSMENT

The Health Effects Research Laboratory of the U.S. Environmental Protection Agency is pleased to announce that its first annual symposium will be held November 1-4, 1993, at the Sheraton Imperial Hotel and Towers in the Research Triangle Park, North Carolina. The Symposium will focus on the role of biological mechanisms research in future risk assessment strategies. The role of mathematical models of biological systems in integrating research activities and reducing uncertainties in the risk assessment process will be discussed. An opportunity will be provided for presenting posters on topics related to the theme of the Symposium. For more information on the Symposium or for submission of abstracts, please contact:

1993 AACR Annual Meeting
Program on Diskettes

The Program of the recent Annual Meeting of the American Association for Cancer Research is available on diskettes for either IBM PC and compatible or Macintosh computers. The computerized Program enables you to search through the more than 3300 presentations that were given at the May 1993 meeting, using any combination of author names, words, phrases, and session headings. A list of titles, authors, and abstract numbers of all the presentations that interest you can be printed out or viewed on-screen. The computerized Program contains a modified version of the powerful search software produced by Research Information Systems, Inc., for *Reference Update*.

The price per set of diskettes is \$12. Payment must be made by check payable to AACR, in U.S. currency drawn on a U.S. bank. To order, send payment to:

American Association for Cancer Research
Public Ledger Building
620 Chestnut Street, Suite 816
Philadelphia, PA 19106-3483

Please specify Macintosh, IBM PC 5 1/4", or IBM PC 3 1/2" format.

Cancer Research

**The Official Journal of the
American Association for Cancer Research**

Carlo M. Croce, M.D., Editor-in-Chief

Subscribe to Cancer Research—the leading citation source of original studies in cancer research and cancer-related biomedical science. Issued semimonthly, *Cancer Research* publishes 7,000 pages of important research each year, including the following regular features:

■ **The most up-to-date articles** in basic research and clinical and epidemiological investigations by authors from the United States and more than 20 countries

■ **Perspectives in Cancer Research**, in which leading investigators explore contemporary and at times controversial topics

■ **Advances in Brief**, a rapid communication category for short but definitive, highly significant reports

■ **Supplemental issues** developed from symposia on relevant subjects

■ **Proceedings of the American Association for Cancer Research**, a special annual issue that offers stimulating new research ideas in abstract form

Now in its fourth year of
publication with a newly
expanded Editorial Board.

Cell Growth & Differentiation

The Molecular Biology Journal of the American Association for Cancer Research

SCOPE

Cell Growth & Differentiation (CG&D) publishes significant, original research on the molecular biology of cancer. Its scope encompasses *in vitro* and *in vivo* studies pertaining to normal and abnormal cellular processes. Topics include oncogenes and tumor suppressor genes, gene expression and regulation, transcription factors, growth factors and their receptors, molecular mechanisms of tumor progression, signal transduction, cell cycle, differentiation, and development.

CG&D's distinguished, international Editorial Board has recently been expanded to cover this broad range of subjects even more comprehensively.

In addition to original investigations, *CG&D's* format includes Research Capsules which summarize and update rapidly changing concepts in the field and a Viewpoints section for signed and anonymous write-in discussion of published articles.

INVITATION TO AUTHORS

Mail manuscripts to Editorial Board member of your choice. For details about manuscript submission, contact:

Dr. George F. Vande Woude, Editor-in-Chief
301-846-1302, FAX 301-696-1549, or the
American Association for Cancer Research
215-440-9300, FAX 215-440-9354.

- Average peer review time--2-3 weeks.
- Average time from acceptance to publication--10 weeks.
- Indexed by *Chemical Abstracts*, *Index Medicus*, *MEDLINE*, *CancerLit*, *BIOSIS Previews*, and *Current Contents*.

Phosphotyrosine Detection

The Next Generation

RC 20: Recombinant anti-phosphotyrosine PY20 antibody engineered for highest affinity

→ Antibody Fc segment removed

→ mutations resulting in higher affinity incorporated

→ direct conjugation to peroxidase or alkaline phosphatase for ease of detection

Normal human fibroblasts treated with EGF for 0(A) 1(B) 3(C) or 5(D) minutes and subjected to western blot in a 1 step method with RC20H recombinant anti-phosphotyrosine

Now, single step non-radioactive detection on western blots in under 1 hour

Higher sensitivity and lower background than conventional P-tyr antibodies
easy to use protocol included

Affordably priced
