

Supplementary Fig. S18: CSF1R inhibition does not induce non-specific killing with B7H3 CAR T-cells *in vitro*. NT, Ctrl and B7-H3 CAR T-cells were cocultured with media only or GL261 *B7h3*-KO tumor cells at a 2:1 ratio in the presence of BLZ945 at different concentrations with restimulation every 3-days against fresh tumor cells until T-cells no longer killed and/or expanded. **(A)** Fold expansion of CAR T-cells in the absence of target cells at different BLZ945 concentrations. **(B)** Expansion of CAR T-cells upon stimulation with antigen-negative GL261 *B7h3*-KO tumor cells with different BLZ945 concentrations (n = 5).
