

Supplementary Table S3. Hazard ratios and 95% confidence intervals for all-cause mortality associated with abdominal visceral adipose tissue and total body fat.^a

	Model 1 ^b				Model 2 ^c			
	HR	95% CI	Race Interaction	Sex Interaction	HR	95% CI	Race Interaction	Sex Interaction
All-Cause Mortality								
Visceral Adipose Tissue	1.11	0.97,1.27	P = 0.93	P = 0.04	1.02	0.82,1.25	P = 0.72	P = 0.06
Fat Mass	0.98	0.83, 1.17	P = 0.37	P = 0.54	0.98	0.77,1.25	P= 0.47	P = 0.67

^aHR per SD increment in each exposure.

^bModel 1 includes age, sex, race, and exam year as covariates.

^cModel 2 includes age, sex, race, exam year, smoking status and the other primary exposure as covariates.
