

Supplementary Table 1. Maximum tumor response achieved in rhabdomyosarcoma and neuroblastoma xenograft tumor models

Xenograft Models	paclitaxel (30mg/kg)	nab-paclitaxel (50mg/kg)
RH4	complete regression	complete regression
RH30	slower tumor growth	partial regression (83% reduction of tumor volume)
SK-N-BE(2)	not available	partial regression (71% reduction of tumor volume)
CHLA-20	not available	slower tumor growth
