

Supplementary Table 2: Results of the experimental verification of the two predictive models.^a

		Confirmatory Patients	Subset NC
% ANXV ⁺ CD45RO ⁺ CCR7 ^{neg} (T _{PM})	Actual class predicted as:		
	NC	1	14
	HNC patient	14	1
	Total	15	15
Classification accuracy	28/30 = 93%		
% ANXV ⁺ CD45RO ^{neg} CD28 ^{neg} (T _{TD})	Actual class predicted as:		
	NC	14	13
	HNC patient	1	2
	Total	15	15
Classification accuracy	27/30 = 90%		

^a 15 HNSCC patients and 15 NC were included in these experiments.
