

Figure S2. ASS1 expression does not correlate with survival in CCOC and ENOC. Kaplan-Meier plots with risk table comparing intense ASS1 expression (histoscore = 300, red line) to low/moderate ASS1 expression (histoscore <300, black line) for **A**, overall survival in CCOC; **B**, progression free survival in CCOC; **C**, overall survival in ENOC; and **D**, progression-free survival in ENOC.
