

Supplementary Figure 6: Correlation between CD4+ and CD8+ T cell responses and SARS-CoV-2 binding antibodies post homologous or heterologous booster vaccination in cancer patients.

A: Correlation between CD4+ T cell responses and SARS-CoV-2 anti-S1 IgG antibody titers

B: Correlation between CD8+ T cell responses and SARS-CoV-2 anti-S1 IgG antibody titers

C: Correlation between CD4+ and CD8+ T cell responses

Correlations were investigated with the use of the Spearman method. A P value <0.05 was considered statistically significant. Regression lines with 95% CI are added.
