

Supplementary Figure S6. Accompanies Figure 5 (ART899 combined with radiation causes significant tumor growth delay *in vivo* and is well tolerated). **(A)** Comparison of tumor size at day 39, from Figure 5B. **(B)** Median time to a tumor size of 1000 mm³ (error bars correspond to 95% confidence interval). The ratio of the median time for the ART899 + 10 x 2 Gy arm to the median time of the 10 x 2 Gy arm is shown. From data shown in Figure 5D. **(C)** Individual mouse graphs from Figure 5E.
