

Supplementary Figure 2. FAK knockdown and p53 mutant expression. A) Western blots of the indicated proteins in HN31 cells. B) Western blots for the indicated proteins in UM-SCC-1 cells (p53 null/lo) expressing empty vector (EV), wild-type p53 (P53wt) or three TP53 mutations (R175H, G245C, and R282W).
