

Figure S1. OS comparison of Stanford versus Kaiser Permanente Northern California (KPNC) cohort by Cox regression modeling, adjusting for age, sex, race, physical performance, comorbidity index, histologic subtypes, treatment and co-mutation status.

Among the entire cohort

Stanford (n = 305) v KPNC (n = 297)

HR on OS (95% CI)

1.12 (0.79-1.61)
