

**A.****B.****C.**

**Supplemental Figure S5. Various pro-metastatic pathways are upregulated downstream of APJ in OvCa cells.** Representative western blot analysis on WCLs from (A,B) OVCAR-3-EV and APJ cells cultured in adherent and suspended conditions for 48 h, probed for indicated proteins. (C) Representative western blot analysis on WCLs from adherent OVCAR-5-EV and APJ cells treated with U0126 (MEK inhibitor, 10  $\mu$ M), Stattic (STAT3 inhibitor, 2.5  $\mu$ M), and GSK458 (AKT inhibitor, 40 nM) for 2 h. GAPDH- loading control; experiments were performed  $\geq 3$  times.
