

Supplementary Figure S3. Screening of HPRT1-knockout clones.

A–C, Cell lysates were prepared from DMS 273 (A), H1048 (B), and SBC-5 (C) cell lines, and HPRT1-knockout clones were screened by ELISA. The clones denoted by the red arrowheads DH1 and DH2 of DMS 273, DH1, and DH3 of H1048, and DH1 and DH2 of SBC-5 were used for further studies as HPRT1-knockout cells.
