

A.

	Upregulated Genes	Downregulated Genes
AvB	126	120
BvC	32	32
AvC	50	50

B.

Supplementary Figure 3. Summary of Differential genes across class comparisons AvB, BvC, and AvC.

A. 246 genes are dysregulated genes in AvB, 64 genes in BvC and 100 genes in AvC. **B.** Overlap of up-regulated genes in AvB, BvC and AvC reveals 3 genes to dysregulated through the process of surgical resection.
