

## Supplementary Figure 4

A)

B)

**Figure S4:** Comparison of bioactivity of dimeric EHD2-scTRAIL and the high molecular weight fraction. A) A preparation of EHD2-scTRAIL containing dimeric and higher molecular weight peaks was fractionated by preparative FPLC SEC using a SuperSW mAb HR column (Tosoh). B) The high molecular weight fraction (HMWF) and the dimeric fraction were tested on Colo205 cells in the absence and presence of bortezomib. After treatment of the cells for 16 h, viable cells were stained with crystal violet.
