

Suppl. Table legends:

Suppl. Table S1: List of cloning primers

Suppl. Table S2: Overview of MAPKi and other drugs used in the screen

Suppl. Table S3: Screening for false positive results using the reporter assay without ELK-1 binding site in DKFZ-BT66 and BT-40 cells

Suppl. Table S4: MAPKi combinations chosen based on low estimated IC50s and pharmaceutical company in consideration of future clinical studies

Suppl. Table S5: Validated IC50 values and c_{\max} and c_{trough} levels of chosen MAPKi
